  - Designed the entire electrical circuit and programmed the Arduino
  - Helped secure a provisional patent for novel input mechanism

Improving Coil Embolization of Brain Aneurysms
Department of Biomedical Engineering, UAB   *Oct '14 - May '17*
Principle Investigators: Prof. Ho-Wook Jun; Patrick Hwang, Ph.D.

Aim: Increase occlusion rates of brain aneurysms treated with coil embolization in an effort to phase out a more invasive treatment

- Assisted in the project's creation by providing ideas for the strategy used to increase occlusion rates
- Independently designed and conducted the *in vitro* experiments
- Built a robust statistical analysis program in MATLAB to process data from the *in vitro* studies
- Prepared and sent samples to collaborators at the Mayo Clinic for the *in vivo* studies
